About Us

Home / About Us

Bir Tikendrajit University is a new age university driving individual empowerment and social progress through blended learning. We believe in providing education that cultivates creative understanding, enables diverse, talented, hardworking graduates to pursue disruptive thinking leading to productivity, to enjoy the pleasures of lifelong learning, and to reap the satisfactions of aiding communities around us. At BTU, we intend to attract & serve students from diverse social, economic and ethnic backgrounds and to be sensitive and responsive to those who have been underserved by higher education. The great philosopher Sri Vivekananda said that if students cannot reach the door of education, education will reach at the door of the students no matter where they live. In the long term, Bir Tikendrajit University aims at becoming a global institution through innovative programs linking humanities, arts, social sciences, pure sciences and health sciences, which will empower our students and faculty to collectively contribute to the world.

Vision

To become a globally known education institution responsive to the dynamic world around us by grooming students to pursue lifelong learning, empowering them to meet & exceed challenges through active participation in shaping the future.

Mission

Our mission is to provide high quality & accessible education through blended learning processes, qualitative & influential research, creative endeavours and scholarly experiences enabling our students to contribute locally and globally to knowledge, innovation and creativity.

Values

- 1. Respect for Knowledge & Integrity** - Respecting expertise and knowledge for its own sake and behaving ethically in all interactions at all levels.
- 2. Creativity & Innovation** - The core intellectual aim of our university education is to foster creativity & innovation in the students and faculty, calling for a greater integration of knowledge among all domains.
- 3. Merit & Inclusiveness** - within the given policy framework of education, all the students, irrespective of descent and prospects, are on a completely equal footing. We are open to everyone and include everyone who shares our quest for knowledge and commitment to pursuing truth, creativity and innovation, and the other virtues of higher education.
